LiveTracker

The module "Livetracker" allows the tracking of an object.

Index

Summary

The Live Tracker for the selected vehicle opens in a new window. Please check, if necessary, on popup blocker or security settings in your browser if the Live Tracker does not open.
The last X messages of the selected object are displayed and continuously updated on the Live Tracker map. You can also see the latest Postionsmeldung again in plain text below the map.

Functions

Buttons:		
(Q icon)	*Quicklink*	creates a quicklink
(? icon)	*Help*	opens a new site
blocked URL	*Onetime Detection*	sends a onetime detection request

Choose vehicle

Click the selection box to show all vehicles. If you start to type a licence number, the selection is reduced accordingly. There is also the possibility the Live Tracker from the overview map and the position list to open out. Click (blocked URL)Open Live Tracker in the map in the info popup of a single vehicle. In the position list of a vehicle click in the Navbar also open on (blocked URL) Live Tracker.

Count of position messages

If the livetracker is opened, you have the possibility to select the count of position messages. Following options are available:
