## Edit form

With the function "Edit" you can reconfigure an already existing form.

## Delete a form

With the function "Delete" you can remove the form from the list and to the associated vehicles.

## Show form

The function "View" opens the form with the corresponding display view.

## Allocate forms a vehicle

First you musst select a vehicle to allocate the form.
Then have the option available to change entries or to deposit a new form.

To complete the process, click "Save".

## Send forms to a vehicle

After you have allocated the form, you must send the new configuration to the vehicle.
Just change the View to "form send".

Now you can see a list of vehicles with current send staus.
For vehicles with the status "still to send", you need to be sent the configuration.
This is done with the function "send modified" or "send all".

The display acknowledge the receipt of configuration with a status message in the position list and in the form overview.
