## Required rights

To use this module the user right "View invoice information" is required

## Overview

This list will show each invoice with invoice number, billed month and costs.

Wich according informations this module allows to show the costs per sub company. The according company is listed in customer column then.

For each bill you can switch to the details page or directly create an export file in Excel or PDF format.

## Details

The details page shows the single items of each bill. Additionally you can order and group the rows by columns "exposure", "text", "vehicle" and "cost center".

Depending on grouping there will be a subtotal sum for each group.

For faster change between the different invoices you can change the billing number. To get a better overview the billed month and customer is shown here, too.

The navigation allows to go back to the overview page or export the current invoice as Excel or PDF file.
