

# **Ich habe restriktive Port/IP-basierende Proxy / Firewall Regeln, welche Zielnetzbereiche muss ich freigeben damit YellowFox funktioniert?**

YellowFox is running their servers in the below listed networks:

- IPv4: 185.43.176.0/22
- IPv6: 2a01:6f60:/32

If your organization is using maps from HERE or Google or OpenStreetMap, you will have to add their maptile servers as well. Please checkout the technical documentation which you may find at their webpages. YellowFox cannot provide any further support on this matter.
