

file_storage/modify_file.php

Allows editing the meta information of a single file from file storage.

Description

GET

`/file_storage/modify_file.php?company=RTI_COMPANYKEY&import=IMPORTKEY&file=UUID&action=action`

Parameters

Parameter	Description	Type	Note	Mandatory
company	RTI company key	string		yes
import	RTI import key	string		yes
file	UUID of requested file	string	You can receive this value via file_storage/get_overview.php or a sreturn value from file_storage/upload_file.php, if the file was directly uploaded via RTI.	yes
action	action type	string	possible values: • BIN: move file to bin • DELETE: delete file permanently (attention: This removes the file permanently so it can not be restored!) • RESTORE: restore a file from bin • RENAME: change shown name of file • MOVE: move file to another directory	yes
name	new name of file	string	only relevant if action "RENAME"	(yes)
path	new path of file	string	only relevant if action "MOVE" Format: folder/subfolder/.../target folder (separated by /) Root does not have to be specified. To move the file to root directory, just leave the param empty. Paths are case insensitive.	(no)

Return

On success you will receive "OK". On missing parameters or errors you will receive "**ERROR:description**".
