Fotorecherche

In the picutre research menu item, you have the option of searching for photos that were taken of vehicles that you have the right to see.

Inhaltsverzeichnis

Research parameter

timespan

You have the option of using the quick selection to select a fixed period of time or your own time period using the individual date fields for the start and end of the search period.

vehicle

It is possible to filter for the photos sent by a specific vehicle. All vehicles are available for which you have the rights and which have the option of sending photos.

driver

You can also filter for a specific personnel in the search results. The personnel must have been registered on the vehicle and you must have the right for this personnel.

Research result

A thumbnail preview will appear for each photo found using the search criteria you entered.

Functions for every photo

Different actions are available for each photo:

- Magnified display
- Download the image
- View the location where the picture was taken on a map
- Create order - the recording location is used for a new order
- delete picture
