## Content

The basis of the driving license control report are the requested and made driving license checks of the selected drivers.

The report provides information about the polling time, whether the driver has carried out or canceled the check, and who has successfully carried out a check at which time via which terminal.

Furthermore, the driver's license and the stored NFC tag Id, as well as the set control interval and the number of successfully performed checks are given.

From the HTML output, you can change the time period, report type and output format using the "switch" button in the upper right area of the output for the current report template settings.

## Output

This report supports the following output formats:

- HTML
- PDF
- Excel
- CSV
